

NORTH EASTERN REGIONAL NODE FOR DISASTER RISK REDUCTION

Catering Support to
Disaster Management in NER
Geospatially

Applications & Services

Disaster Domains

- ❖ Floods
- ❖ Forest Fire Alerts
- ❖ Earthquakes
- ❖ Landslide
- ❖ Crop Damage
- ❖ Earthquakes
- ❖ Epidemiological Disasters
- ❖ Hazard Vulnerability Assessment
- ❖ Industrial Hazard
- ❖ Meteorological Services
- ❖ SatCom for Disaster

Operational Services

- ❖ Earthquake Information System
- ❖ Flood Early Warning System
- ❖ Landslide Information System
- ❖ North-Eastern Forest Fire Information System

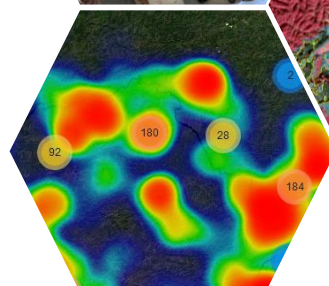

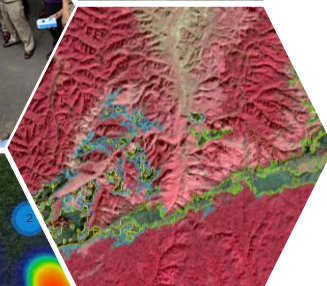

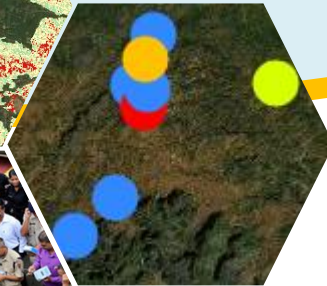

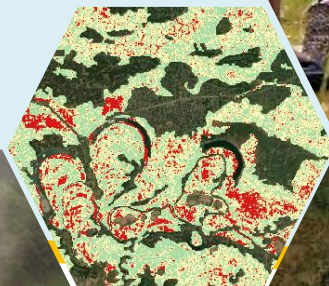

New Initiatives

- ❖ GeoWeb Services
- ❖ UAV Services

Space based input preparation for disaster risk reduction for the states of NER with special emphasis on flood, landslides, forest fire, thunderstorm, industrial hazards, earthquake precursors etc

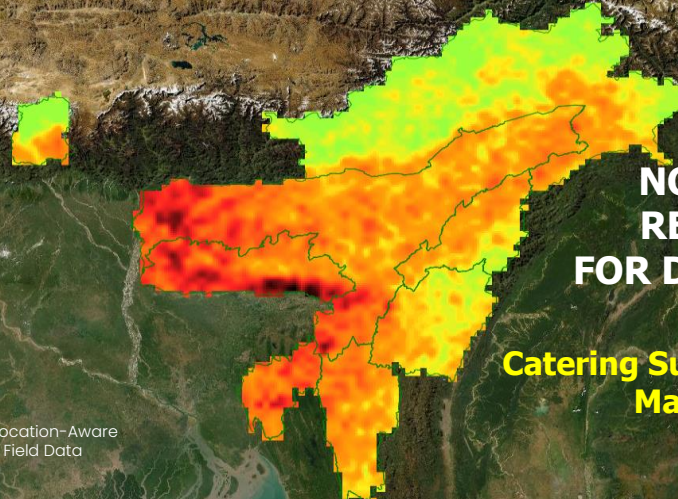

Major Highlights

- ✓ Comprehensive geo-spatial database for different disaster vulnerable areas
- ✓ Development of relevant tools & simulations for effective decision making on various disasters
- ✓ Faster and enhanced dissemination of space enabled services via Satellite based connectivity
- ✓ Generation of actionable products and services as per the requirement of the region
- ✓ Ensures reliable mode of communication for better disaster mitigation

High Precision Location-Aware Mobile Apps for Field Data Collection

NORTH EASTERN REGIONAL NODE FOR DISASTER RISK REDUCTION

Catering Support to Disaster Management in NER Geospatially

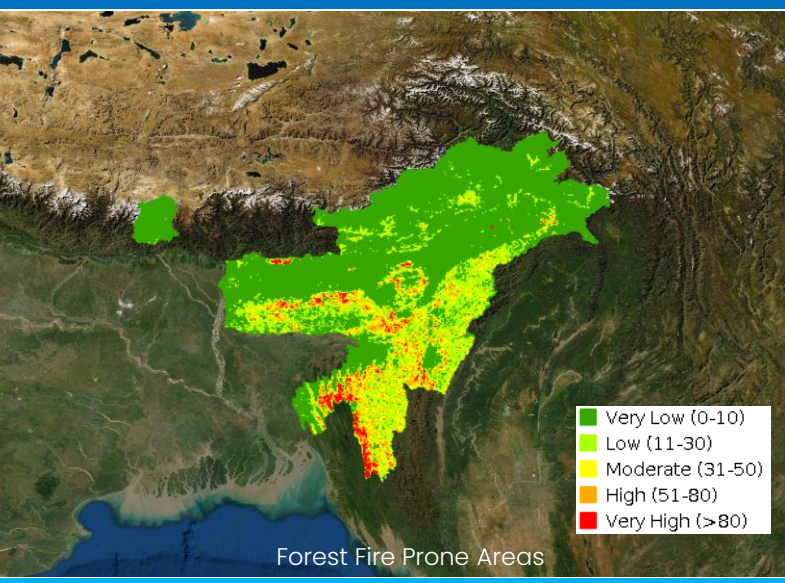

Dashboard for Multi Alert Dissemination

Major Highlights

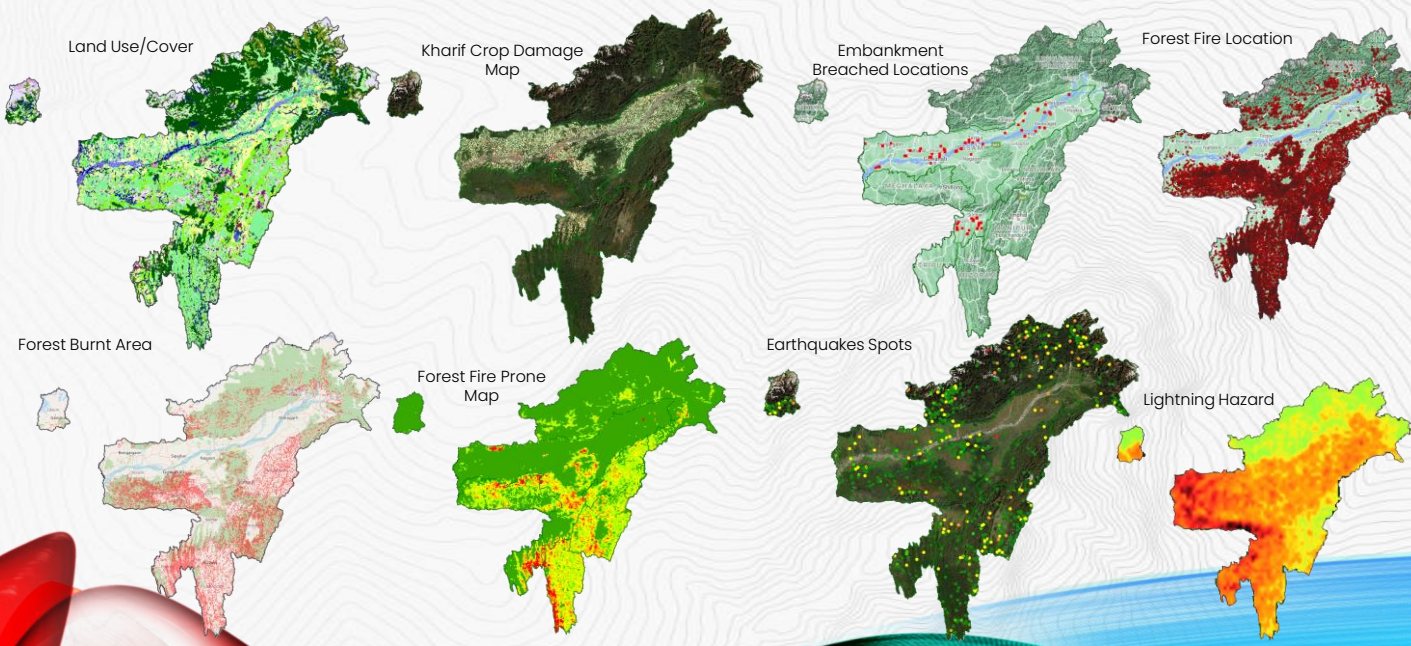

- ✓ Dynamic geospatial data pertaining to disaster prevalent in NER
- ✓ Single-Window Platform for Alert Dissemination, Monitoring and Analysis
- ✓ On-the-Fly Statistics generation for all data for immediate decision making
- ✓ Interactive Visual Analysis and Information Retrieval

BASE LAYERS	OVERLAYS
